SILICONALPS

HIGH PERFORMER
OF TOMORROW

SILICON ALPS Cluster is a fast growing network of companies, organisations and research institutions dedicated to support the electronic and microelectronic sector in the South of Austria.

# SILICON ALPS
AREAS OF EXCELLENCE

CYBER SECURITY SYSTEMS

SECURE | TRUSTWORTHY | ENCRYPTED |
Wir betonen die Kompetenz der Region im Bereich „Cyber Security", indem wir die zukünftigen Trends diskutieren und mitgestalten.

SECURE | TRUSTWORTHY | ENCRYPTED |
We emphasize the region's depth in „Cyber Security" expertise by discussing and forming the future trends.

POWER ELECTRONICS

ENERGY-SAVING | SUSTAINABLE | ENABLING |
Wir unterstützen mit der Area of Excellence „Power Electronics" Unternehmen, Forschungsinstitute und Start-ups und bringen sie an die Spitze.

ENERGY-SAVING | SUSTAINABLE | ENABLING |
We established the Area of Excellence „Power Electronics" to support companies, research institutes and start-ups in this field and bring them to the forefront.

RFID & WIRELESS IoT

FLEXIBLE | ACCESSIBLE | CONNECTIVE |
RFID, die Technologie zur kontaktlosen Datenübertragung, vereinfacht viele Prozesse in der Wirtschaft und wird mit dem „Internet der Dinge" zu einem Teil des täglichen Lebens.

FLEXIBLE | ACCESSIBLE | CONNECTIVE |
RFID, the technology for contactless data transmission, simplifies many processes in the economy and becomes now with the „Internet of Things" a part of everyone's daily life.

SMART SENSOR SYSTEMS

INTELLIGENT | PREDICTIVE | LIFE-SAVING |
Mit dem „digitalen Zwilling" und der Sensorik in unterschiedlichen Anwendungsbereichen, z.B. LiDAR, stellen wir die Weichen für die Sensor Systems in der Zukunft.

INTELLIGENT | PREDICTIVE | LIFE-SAVING |
With the „digital twin" and sensor technology in various application areas, e.g. LiDAR, we are paving the way for the sensor systems in the future.

Best partners for an excellent network

Austria is one of the top 5 regions of the European electronics and semiconductor industry, along with Germany, Belgium, France and Italy. The companies and organizations united in the SILICON ALPS Cluster network are thus at the center of the digital and green transformation of the European Union. The SILICON ALPS Cluster sees itself as a bridge builder with a view beyond borders – across national and international borders and industry boundaries, new ideas are generated with and for industrial and research companies, projects are initiated and profitable markets are developed.

As a cluster organisation, we act as an innovation and project hub between all regional players as well as between the European industry organisations at industrial level (as IPCEI partners) and political initiatives (ESRA, Committee of the Regions). The heart of the cluster consist of the companies and organizations that we present in this publication.

As a cluster organization, we connect the future. For the region and for our companies.

RESEARCH & EDUCATION

SERVICES

FACTS & FIGURES

PROFESSIONALISM

… means achieving results and objectives together through solution-oriented processes and customer-specific services for us.

LOYALTY

… means for us to responsibly build bridges, achieving commitment and innovation trough transparency and integrity.

THE CLUSTER HAS THE FOLLOWING OVERARCHING OBJECTIVES:

‣ Boosting value creation in Carinthia and Styria

‣ Enhancing the appeal of the region for startups, businesses, researchers, etc

‣ Ensuring, strengthening and advancing employment opportunities

‣ Augmenting the competitiveness and innovative capacities of our partners

‣ Amplifying the local, national and international visibility of our partners and location

WHY IS THE ESBS* SECTOR VITAL?

‣ Semiconductors underpin half of the global GDP (amounting to $96 trillion in 2021)**

‣ The ESBS sector is a major global innovator, influencing various domains such as telecommunications, transportation, automotive industries, etc.

‣ Incorporating semiconductor technology in supply networks can cut energy losses by up to 50%**

*Electronic & software based systems
** FEEI Positionspapier EU Chips Act, April 2023

OPENNESS

… means for us to provide creative and agile impulses, developing ideas together through interdisciplinary collaboration.

CULTURE

… means for us to create the foundation for a trustworthy network through courage, empathy, and respect, thereby fostering professionalism, loyalty, and openness.

S1

ams OSRAM

The ams OSRAM Group is a global leader in intelligent sensors and emitters. With over 110 years of history, they add intelligence to light and passion to innovation. These innovations benefit the customers in the automotive, industrial, medical and consumer markets, enhancing health, safety and convenience, while minimizing environment impact. With 20,000 employees and 15,000 patents, they focus on sensing, illumination and visualization to improve quality of life.
